

Hello Folks, If you haven't already completed the survey, please do so before October 12th.

THANKS,

## Ontario Terrestrial Invasive Plant Council

A SURVEY has been developed to assess the extent of work being done by conservation organizations, resource agencies, research institutions and individuals directly involved with the management, control, research and outreach/education of terrestrial invasive plants in Ontario. Data collected from this on-line survey will help identify gaps and overlaps in the programs of Ontario institutions and organizations.

The results of this survey will be summarized in an on-line report, therefore allowing sharing of information and ideas between the various organizations involved so that future research efforts on terrestrial invasive plant species are more streamlined, coordinated and collaborative in nature. The results will also be discussed at the conference on October 26th.

The Link to the survey is below. The survey must be completed by: Friday October 12th, 2007
